This report outlines the action that will be taken to manage the Corella problem this upcoming season.

**Background**

Every year the Perenjori community is faced with the problem of corellas coming into town and causing significant damage to parks, gardens, ovals, trees and other infrastructure. The Shire of Perenjori applies for and obtains a Damage Licence to allow for action to be taken. Last year the Shire engaged the services of a trapper where a feeding ground was set up and monitored to allow for the setting of a net system where the birds would be caught and then disposed of. This system failed to yield results. The following provides a detailed list of actions and the plan to ensure this year we are able and ready to attend to the corellas.

**Comment**

The Community expectations in regards to the issue of Corellas and the damage they cause has been something that the Shire of Perenjori has had to deal with for years. Different methods of tackling the problem have been tried and have proven either unsuccessful or limited in their effectiveness.

This year it is hoped that with some forward planning a coordinated attempt will be made to bring the Corellas under control and limit the damage they cause to the infrastructure in the Perenjori town site.

**Voting Requirements – Simple Majority**

<b>That the action plan for 2014 for the control of the Corellas be noted.</b>
