

Latham Refuse Site Survey

Currently the Shire's Latham refuse site is nearing the end of its operational life. The Shire is facing increasing costs to ensure the landfill complies with the increasingly stringent regulations for the operation of landfills. It incurs a significant portion of the Shire's budget to operate, services only a relatively small population and there is no revenue received from the operation of the facility.

Given these pressures the Shire is considering options for the future use of the site. One of the options under consideration is establishing a transfer station at the site with waste transported to the Perenjori landfill for disposal. A transfer station has improved safety and risk exposures compared to a landfill and presents opportunities for increased resource recovery for the Shire and the community.

We are seeking your views on the future of the site.

Please complete only one survey per property. This survey will take approximately 10 minutes to complete. If you own multiple properties, you are entitled to one survey per property.
